

5th Field-Map International User Conference  
October 1-3, 2014

# The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

Dušan ADAM

The Silva Tarouca Research Institute for Landscape and Ornamental Gardening, p.r.i.  
Czech Republic

The pit-mounds microtopographies mapping by Field-Map in Michigan forests, USA

## Working with Field-Map

The Silva Tarouca Research Institute for Landscape and Ornamental Gardening, p.r.i.  
Department of Forest Ecology

- Since 2001
- Czech natural forest (reserves)
- Repeated detailed research (stem) – 24 plots (360 ha)
- Monitoring (statistical inventory) – 12 plots (750 ha)

...more at [www.pralesy.cz](http://www.pralesy.cz)

- 3x Field-Map (1x FMIA)
- 3x Hammerhead + MapStar + Impulse
- Analogue calipers

# Project

## **AMVIS - KONTAKT II - LH12039**

Role of disturbance in **soil** formation and **soil** variability in temperate forests: synthesis through soil-formation-processes, spatial and time scales

American Science Information Center (s&t) 

**2012 – 2015**

Project resource:  
VÚKOZ, p.r.i.

Partner:  
Michigan State University

# Project

## Project regions

**FM 2009** Haplic Cambisols – Western Carpathians (Razula, CZE)

**FM 2008** Entic Podzols – Novohradské hory Mts. (Žofín, CZE)

**FM 2013** Albic Podzols – Michigan (USA)

## Project phases

Windthrow events dating (2012)

**FM 2013** Windthrow effect on pedogenesis at the tree scale (2013)

Pedogenesis at the landscape scale (2014)

Windthrow impact at forest dynamics (2015)

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

## Why to map pit-mounds?

**Understanding disturbance regime in forests**

Solving aspects:

- disturbance dating
- soil variability
- tree spatial patterns

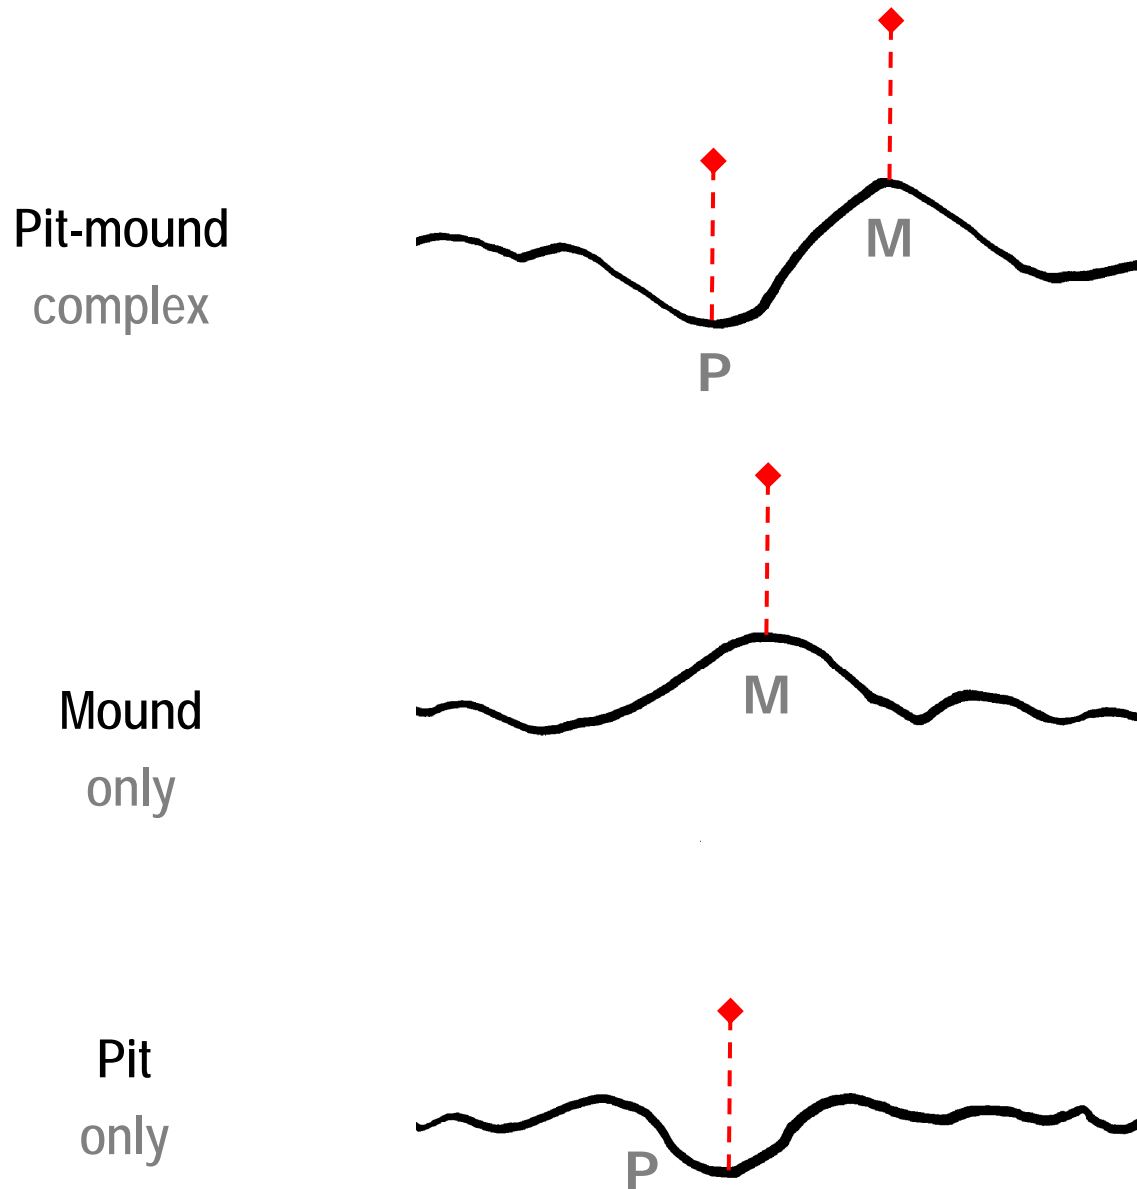

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

## Pit-mound explanation (vertical)

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

## Pit-mound survey (Field-Map)

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

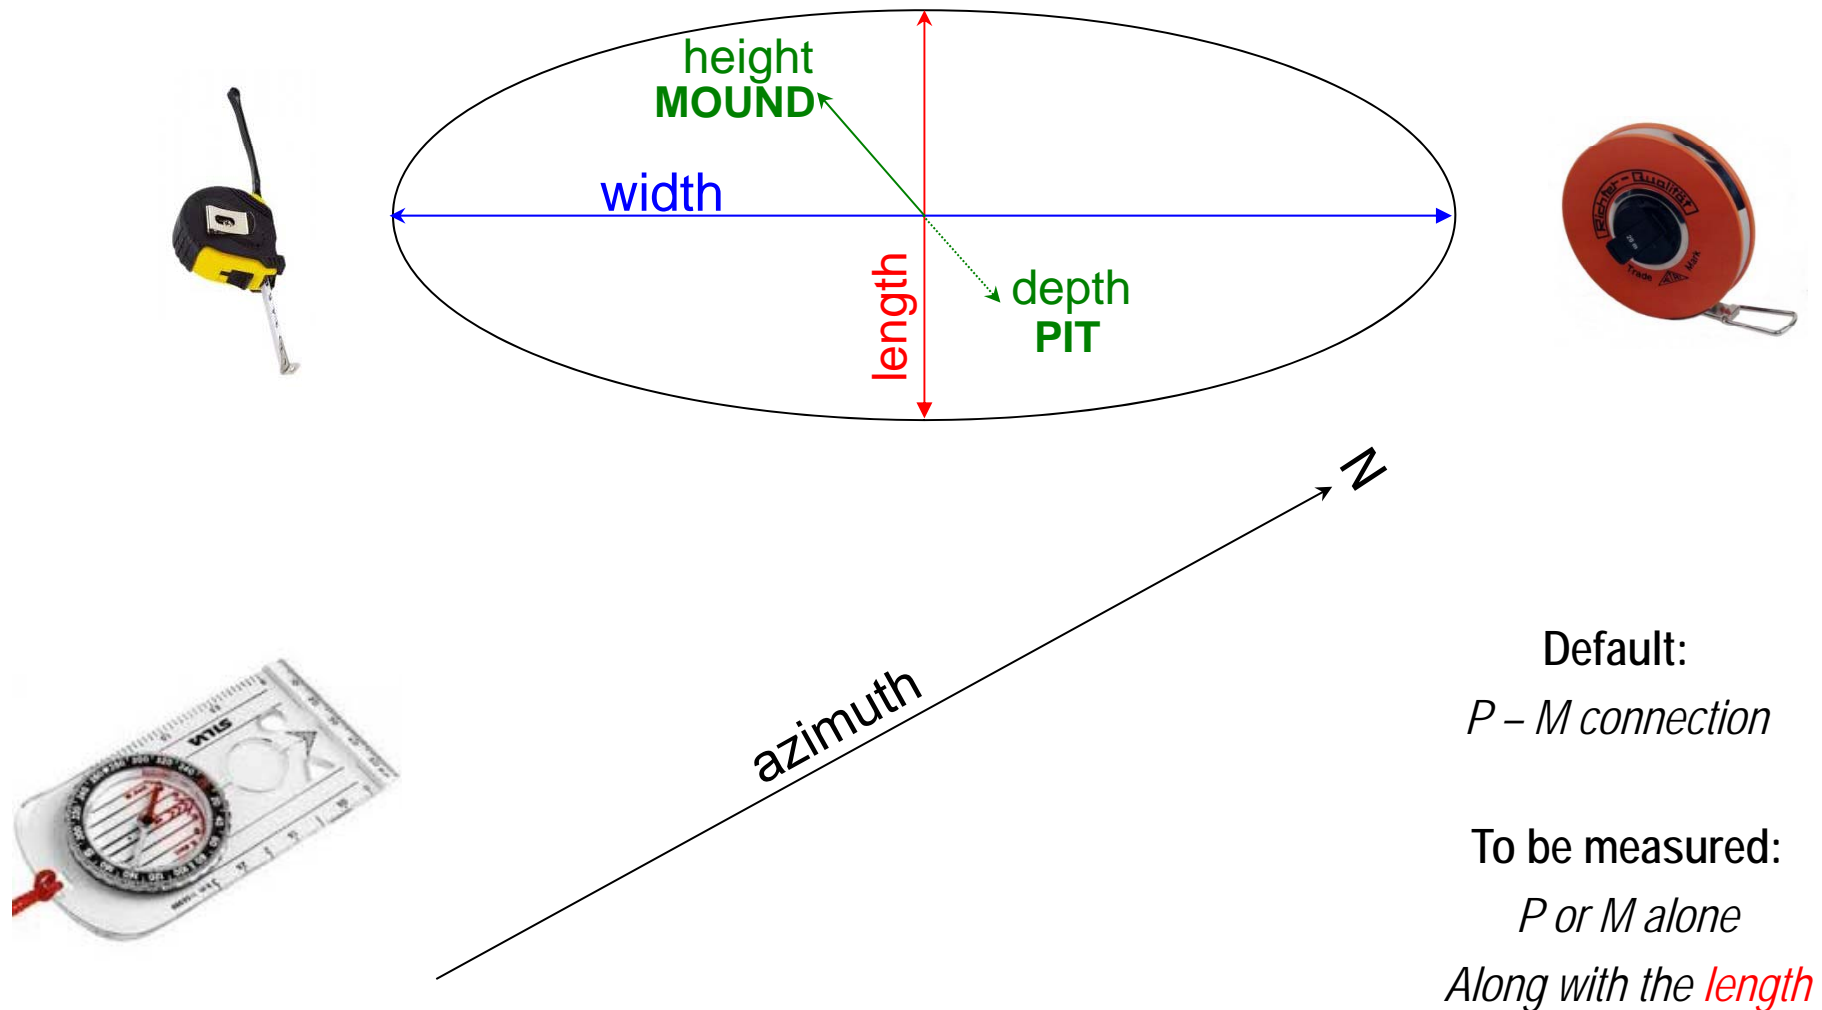

## Pit-mound explanation (horizontal)

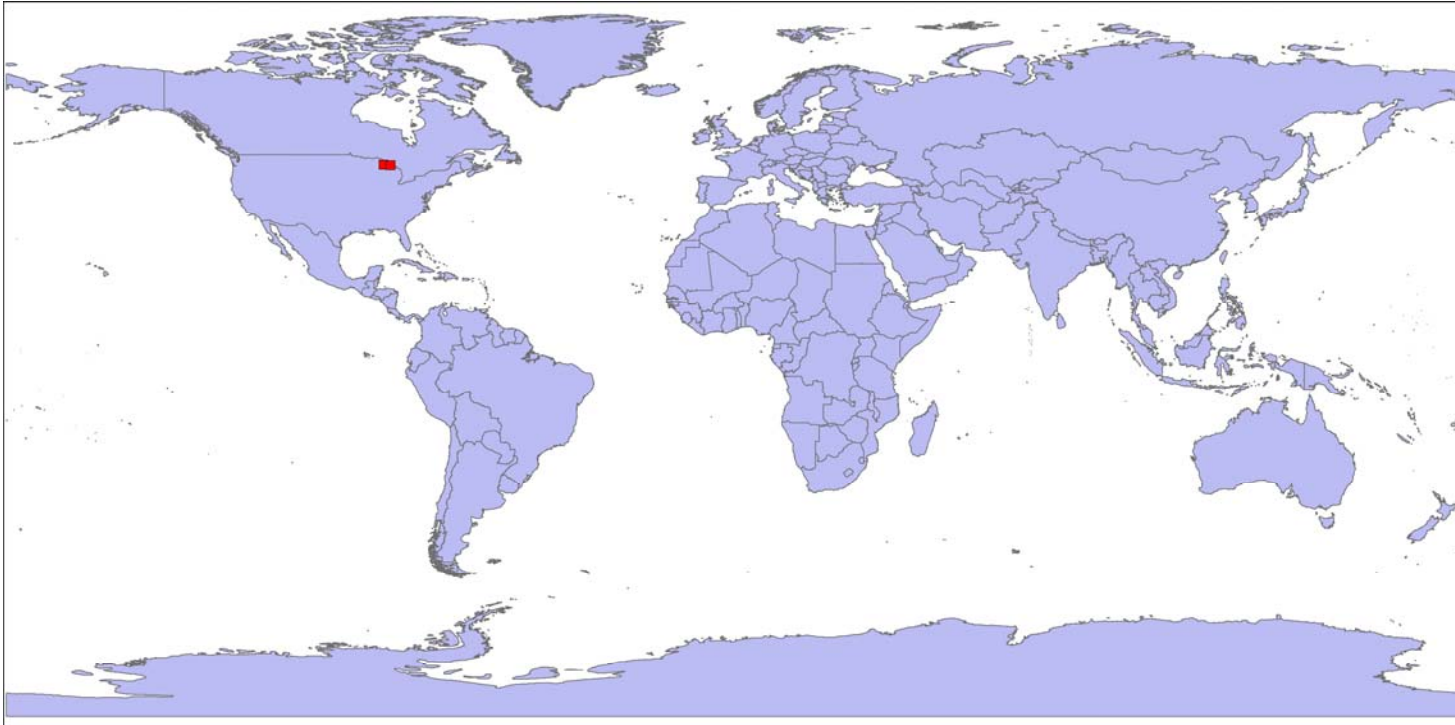

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

# Pit-mound metrics (less Field-Map)

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

## Sites (2013)

USA

Michigan

Upper Penninsula

2 sites (120 km dist.)

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

## Sites

Site **Strong's**

N 46°19', W 85°04', 246 m a.s.l.

Site **Munising**

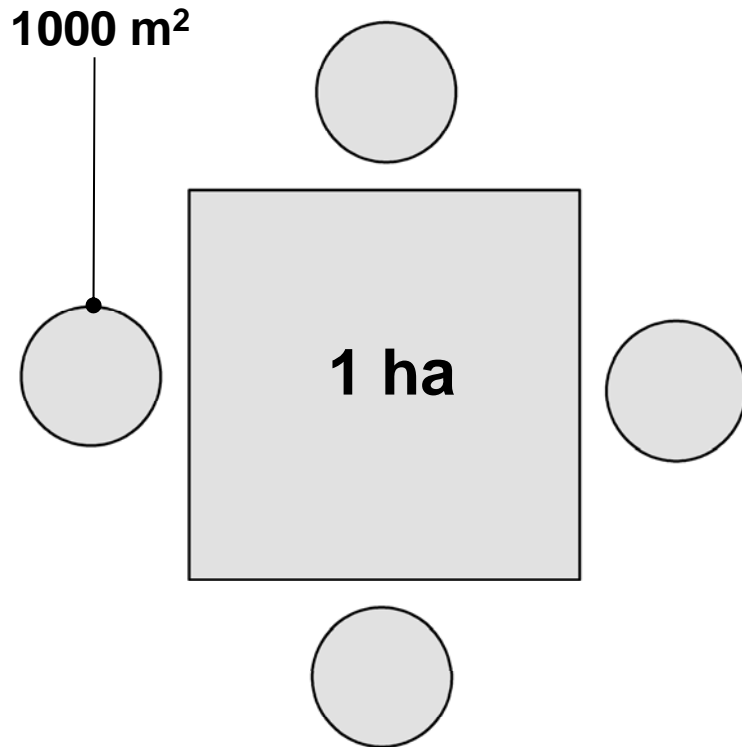

N 46°23', W 86°41', 228 m a.s.l.

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

# Plot arrangement

Strongos

1 x square plot (1 ha)  
4 x circle plot (á 1000 m<sup>3</sup>)

Munising

1 x square plot (1 ha)  
8 x circle plot (á 500 m<sup>3</sup>)

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

# Soil profile network arrangement

Munising

Regular network: 127 pts.

Random network: 109 pts.

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

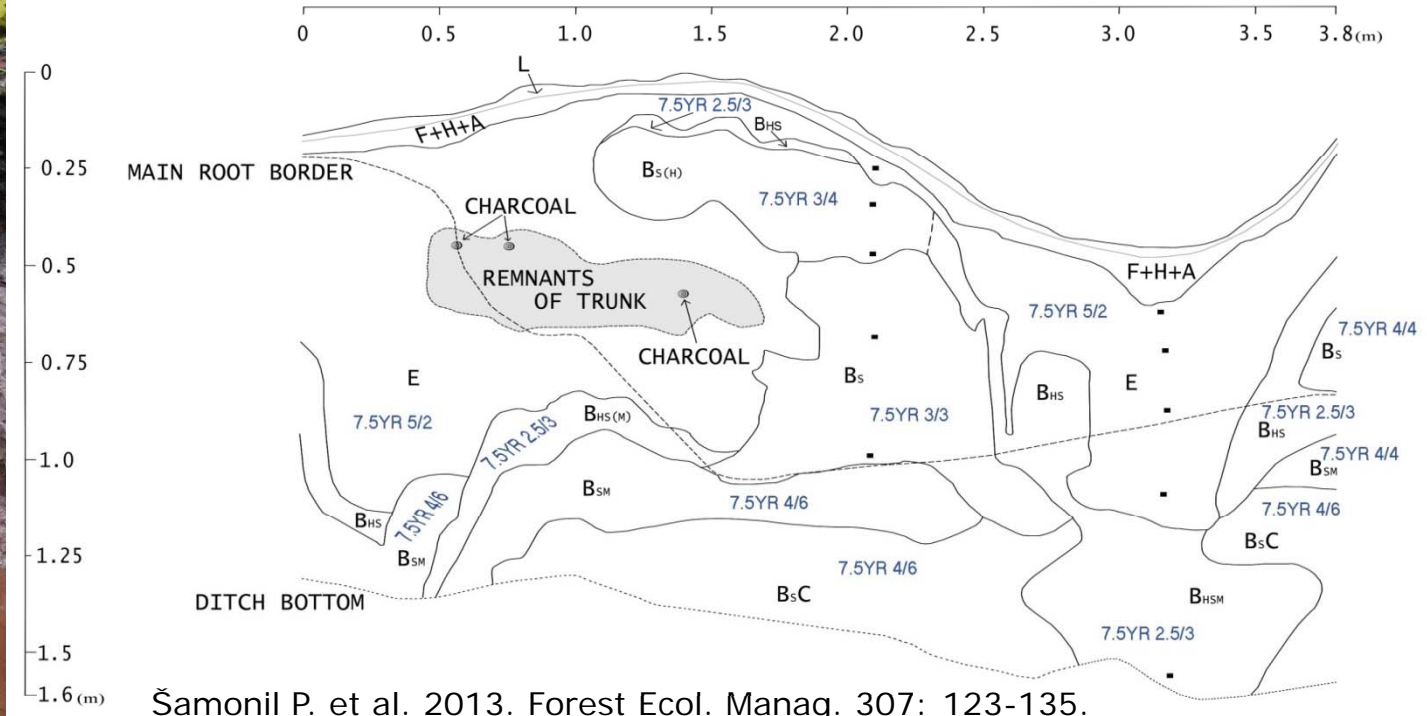

## Measurements overview

<b>Site Strongs</b>	<b>Topic</b>	<b>Site Munising</b>
886 (P:376 + M:510)	<b>Pit-mounds pnts.</b>	900 (P:377 + M:523)
14	<b>Deep profiles pnts.</b>	4
-	<b>Shallow profiles ntw.</b>	317 (193 +124)
-	<b>Trees standing</b>	880
-	<b>Trees lying</b>	113
9	<b>Geomorph. plgns.</b>	23
1793	<b>DEM pnts.</b>	2937

# Albic Podzols on outwash, (Michigan)

Longevity > 6000 years, different paths of pedogenesis

Šamonil P. et al. 2013. Forest Ecol. Manag. 307: 123-135.

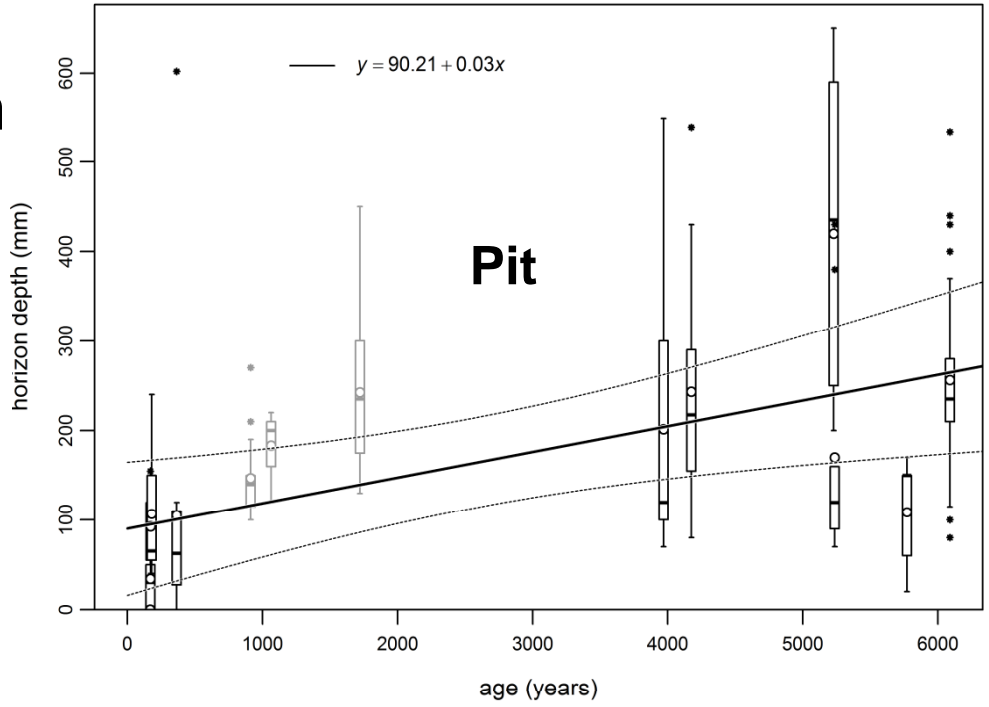

# Development of E-horizon

## Mound

## Pit

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

## **Pit-mound metric stats**

Width (0,3 – 6,4 m), avg. **2,3** m

Length (0,4 – 3,9 m), avg. **1,3** m

Height/Depth (0,15 – 0,55 m), avg. **0,22** m

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

# Resulting maps

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

# Resulting maps

# Conclusions

## Field-Map helped us...

### Set up plots and navigate within

- basic square plots
- accessory circle plots

### Set up the soil profile networks and navigate within

- regular network
- random network (refilling regular ntw.)

### Survey geo-objects

- pit-mounds microtopographies
- standing stems
- lying stems
- geomorphology areas
- soil profile points (real position survey)

The pit-mound microtopographies mapping by Field-Map in Michigan forests, USA

# Conclusions

**Field-Map**  
**handy and useful device in...**

Setting up
